WORK EXPERIENCE

Backend Engineer ~ Part time, *NexCore IT*
October 2025 – Present | Remote

- Architected and delivered an end-to-end venue & entertainment booking platform for a UK-based hospitality **business**, featuring real-time dart lane slot reservations, event ticketing, and conflict-free scheduling.
- Engineered core backend systems for an EdTech/LMS platform, featuring dynamic course slot scheduling, live class integrations, and automated WhatsApp notification pipelines for upcoming class reminders and recurring billing.
- Delivered backend solutions for 7+ e-commerce (non-SaaS) and SaaS platforms, covering POS, inventory, and multi-channel sales.
- Built Facebook Ads integration with Marketing API SDK: real-time analytics, ROAS tracking, multi-account support, and secure credential storage.
- Implemented WhatsApp Business API automation for bulk campaigns with segmentation and dynamic personalization.
- Enhanced a SaaS POS & inventory system with WooCommerce integration, secure payments (bKash, SSLCommerz), fraud detection, reporting, SMS/email marketing, and courier integrations (Pathao, Steadfast).
- Developed a custom WooCommerce–Laravel plugin: order tracking, brand taxonomy, and 5+ more features.

Junior Software Engineer, *Annon IT*
August 2024 – September 2025 | Remote

- Contributed to the SaaS European-standard payslip generation system, integrating 3+ third-party APIs (Pappers, Mon Entreprise).
- Implemented multi-tenancy & SSO with automated tenant provisioning, reducing dependencies and cutting setup time by 59%.
- Automated deployments using Docker & Kubernetes for scalable, reliable infrastructure.
- Maintained Vue.js modules, optimized performance, fixed N+1 query issues, and improved error handling.
- Integrated AI/LLM features via OpenRouter into production SaaS.

Laravel Developer, *Lomeyo LLC*
October 2023 – July 2024 | Remote

- Enhanced TALL stack projects (Adlisting, JobPilot, JobFlix), improving delivery efficiency and code quality.
- Implemented unit & feature tests, integrated 2 payment gateways, ensuring secure transactions.
- Streamlined QA processes, resolved bugs, and maintained platform stability across multiple live products.

EDUCATION

International University of Business Agriculture and Technology,
Bachelors in Computer Science and Engineering
January 2018 – January 2022 | Dhaka, Bangladesh
